## PROPER STORAGE

**WARNING** - Extreme conditions can damage wood.

With proper care and maintenance, your wood watch can be worn and enjoyed as long as you care for it properly when not in use.

Wood is susceptible to sudden and extreme changes in temperature and humidity. Putting stress on wood can lead to swelling and cracking. It is important to store your watch properly when not being worn.

**Ideal conditions are:**  
Not in direct sunlight  
30-60% Humidity  
55-85 °F

## WATER RESISTANCE

All Jord timepieces are splash-proof but should not be submerged in water. It should be noted that the wood does not handle water nearly as well. Prolonged exposure to moisture or water submersion should be avoided if at all possible. Wood is susceptible to water damage as moisture can cause expansion. This can potentially result in link failure and deterioration the exterior finish.
