

INSTRUCTIONS:

- Print out this sheet.
 - Use the box below to draw/write what you would like to have engraved on the box.
 - Make sure you use black ink so it is clearly readable (black felt pen or marker is ideal).
 - Upon completion, scan this document
 - Select the watch box engraving option and upload your scanned page as per the instructions.
 - Add the product to cart and checkout as normal.
-

DRAW/WRITE HERE:

Write or draw whatever you like in the box to the left. Shading and gradients will not show up on the engraving. It is best to use a solid black pen or marker. Any text or drawings that go outside the lines will not be engraved.

If you wish to upload a black & white image instead of using this sheet, simply upload the image file directly. Please remember that shading and gradients will not show up on the engraving. The image must be solid black and solid white only (ex: a black and white logo).

VERIFICATION & SIGNATURE:

I understand that laser engraving is customized work and is non-refundable. I further understand that Jord will do its very best to recreate my drawing but there is no guarantee that it will look exactly as it does above.
